Q. India to Invest __ in Infrastructure by 2030.

A) ₹143 Lakh Crore

B) ₹175 Lakh Crore

C) ₹191 Lakh Crore

D) ₹210 Lakh Crore

Answer : A

- ✓ India is gearing up for a substantial infrastructure spending spree, with a plan to invest nearly ₹143 lakh crore between fiscal years 2024 and 2030.
- ✓ This represents more than double the ₹67 lakh crore spent on infrastructure over the past seven financial years starting from 2017.
- ✓ The rating agency CRISIL shared this information in its Infrastructure Yearbook 2023, underlining the significance of this ambitious undertaking.
- ✓ **Economic Growth and Income Projections :**
- ✓ CRISIL Ltd.'s Managing Director and CEO, Amish Mehta, expects India's gross domestic product (GDP) to grow at an average rate of 6.7% through fiscal year 2031, positioning India as the fastest-expanding large economy. He predicts a significant increase in per capita income, rising from \$2,500 to \$4,500 by fiscal year 2031, effectively transitioning India into a middle-income country. This growth trajectory will be driven by extensive infrastructure development with a strong focus on sustainability.
- ✓ **Electric Vehicle Revolution :** CRISIL predicts a substantial shift towards electric vehicles, with the share of EVs in India's overall automobile sales projected to reach 30% by 2030. Two-wheeler EV sales are expected to outpace other segments up to 2028, while demand for EV buses will be driven by state transport undertakings. Factors such as favorable total cost of ownership and total cost of acquisition, along with increased model availability for two- and three-wheelers, are expected to support EV adoption in the coming years.
- ✓ **Renewable Energy Surge :** CRISIL also anticipates a significant expansion of renewable energy capacity, estimated to grow fourfold between fiscal years 2023 and 2030. Solar energy will account for half of the incremental non-fossil generation. To further enhance sustainability, the adoption of emerging technologies like 'floatovoltaics' (floating solar), offshore wind technology, and green hydrogen will be pivotal
- ✓ **Green Hydrogen Potential :** The hydrogen sector is set to attract substantial investments, estimated at ₹1.5 lakh crore between fiscal years 2024 and 2030. Mandates for green hydrogen use and incentive schemes will play a crucial role here, as the production cost of green hydrogen is double that of fossil-based hydrogen.
